Kotlin | Jetpack Compose | MVVM | Coroutines | Retrofit | Room | JUnit + MockK | Espresso / Compose UI Tests | GitHub Actions (CI)

CORE STRENGTHS

- **Craftsmanship:** readable, reusable Kotlin code; refactoring with SOLID & patterns.
- **Testing mindset:** unit + UI tests with clear boundaries and regression focus.
- **Delivery:** CI familiarity, release discipline and versioned builds.
- **Reliability:** strong debugging and root-cause analysis habits.
- **Collaboration:** clear communication and iterative delivery.

SKILLS

Android
Kotlin, Compose, Android SDK, Material 3, Navigation

Architecture
MVVM, Clean Architecture, DI (Hilt/Dagger), Repository

Data & Networking
Retrofit, REST, Room, Coroutines, Flow

Testing
JUnit, MockK, Espresso, Compose UI Testing

Tooling
Git, GitHub Actions (CI), Gradle, Android Studio, Postman

LANGUAGES

English — Upper Intermediate
Turkish — Native

PROFILE

Android Developer focused on building scalable and maintainable Kotlin apps with Jetpack Compose and modern architecture. Strong emphasis on testable code, refactoring, and predictable UI state management. Background in automation engineering with a reliability mindset, strong debugging, and continuous improvement habits.

PROFESSIONAL EXPERIENCE (PREVIEW)

Software Engineer — AKTEK Oct 2022 – Feb 2023
Owned automation workflows end-to-end; integrated Oracle DB/SQL; defined KPIs/monitoring signals; improved efficiency (~20% memory reduction).

Software Engineer — VBM Sep 2021 – Oct 2022
Delivered automation solutions; troubleshooting and root-cause analysis; stability improvements; reduced delivery timelines via process optimization.

ANDROID PROJECT HIGHLIGHTS

Real-time Network Device Tracker
Kotlin • MVVM • Retrofit • Coroutines

- Android app fetching IP/MAC device lists from a Raspberry Pi backend (Node.js).
- Resilient UI state updates and robust networking with structured concurrency.
- Optimized request flow to scan ~15 devices within seconds while keeping UI responsive.

BringItems — Shopping List App
Jetpack Compose • Material 3 • Navigation

- Modern Compose UI with clear state handling and scalable navigation flows.
- Sharing integration using Android Intent APIs.

Expense Analyzer
Android • Data parsing • Insights

- CSV-based expense tracking with analytical reporting and savings insights.
- Designed UI components for clear presentation and maintainability.

SOFTWARE ENGINEER — AKTEK | Oct 2022 – Feb 2023

- Owned automation workflows end-to-end including quality checks, operational readiness and performance tracking.
- Integrated enterprise systems with Oracle DB; used SQL for reliable data processing.
- Improved efficiency by reducing memory usage by ~20% and operational costs by ~15%.
- Defined KPIs and monitoring signals to observe performance trends.

SOFTWARE ENGINEER — VBM | Sep 2021 – Oct 2022

- Delivered automation solutions; troubleshooting and root-cause analysis across unreliable workflows.
- Improved stability through iterative fixes and process improvements.
- Reduced project delivery timelines from ~6 months to ~1 week through optimization.

EDUCATION

- **B.Sc. Information Systems Engineering**
  2020
- **High School Diploma — Database Programming**
  2014

CERTIFICATIONS

- Google Associate Android Developer (Kotlin)
- Kotlin for Android Developers — JetBrains

NOTES

Interested in roles emphasizing code quality, automated testing, and scalable Android architecture.
